# CONFERENCE ORGANISATION

EURO2015 was the product of intensive collaboration over more than two years. Here we give some of the vital facts and figures about the conference.

# Conference Organisation

The EURO2015 Conference was held at University of Strathclyde in Glasgow, from 12-15 July 2015. The event was organized under the auspices of the UK Operational Research Society working in collaboration with the University of Strathclyde and with EURO.

The Programme Committee was led by Prof David Pisinger of DTU, and the Organising Committee was led by co-chairs Prof Val Belton and Prof Tim Bedford of the University of Strathclyde.

## Programme Committee

David Pisinger, Chair of the Programme Committee  
Technical University of Denmark, Denmark

Gernot Tragler  
Vienna University of Technology, Austria

## Collaborating Organisations

University of  
Strathclyde

The University of Strathclyde traces its origins back to its establishment in 1796 as a 'place of useful learning' at the time when the industrial revolution was transforming society. Its founder, John Anderson, was a friend of the inventor James Watt and of the American "founding father" Benjamin Franklin whose foundation of the University of Pennsylvania was also based on similar principles. Today Strathclyde University is recognised as a leading international Technological University, with an excellent record of industrial research collaboration symbolised by its new Technology and Innovation Centre. The Department of Management Science plays a key role in collaborative research with industry – often working closely with colleagues in the Engineering, Science and Social Science faculties. Management Science is an important part of Strathclyde Business School – one of the UK's top ten Business Schools as demonstrated in the recent Research Excellence Framework results.

### The Association of European Operational Research Societies

**EURO**

The Association of European  
Operational Research Societies

**EURO** is the Association of European Operational Research Societies. It is a non-profit organisation, founded in 1975 and domiciled in Switzerland, and its objective is to promote Operational Research throughout Europe. EURO is a regional grouping within the International Federation of Operational Research Societies (IFORS) and full membership is restricted to national societies that are members of IFORS.

EURO is regulated by a Council consisting of representatives/alternates of all its members and an Executive Committee, which constitutes its board of directors. In addition the Executive Committee and Council select an IFORS Vice-President to liaise with IFORS. EURO is supported by additional officers who have specific responsibilities and administrative roles.

The aims of EURO are the advancement of knowledge, interest and education in operational research by the exchange of information, the holding of meetings and conferences, the publication of books, papers, and journals, the awarding of prizes, and the promotion of early stage talents. Full details of EURO activities can be found at: <https://www.euro-online.org/>

### The OR Society

Founded over 60 years ago in succession to the Operational Research Club which was set up in 1948. The UK's OR Society is the world's oldest-established learned society catering to the Operational Research (O.R.) profession, and one of the largest in the world, with 2,700 members in over 60 countries.

The Society's principal activities are:

- Fostering higher standards in O.R. by providing the world's most extensive training programme in O.R. and Analytics
- Enabling members of the profession to keep up to date by publishing journals of international repute and organising national, international and specialist conferences in the subject.
- Enabling members to share their work through a Document Repository and by the Society's special interest groups and regional societies, which organise regular meetings open to all.
- Demonstrating to the wider community the benefits, in terms of greater efficiency, improved service or otherwise, that O.R. can bring to society. Activities include the Science of Better [www.scienceofbetter.co.uk](http://www.scienceofbetter.co.uk), O.R. in Schools and Pro Bono O.R. initiatives

More details about the activities of the OR Society can be found at [www.theorsociety.com](http://www.theorsociety.com)

MCI

At MCI, we believe that when people come together, magic happens.

That's why we've been bringing people together through innovative meetings, events, congresses and association management since 1987.

Through face-to-face, hybrid and digital experiences, we help companies and associations to strategically engage and activate their target audiences, building the dedicated online and offline communities they need to strengthen their brands and boost their performance.

An independent, privately held company with headquarters in Geneva, Switzerland we have offices in over 30 countries across Europe, the Americas, Asia-Pacific, India, the Middle East and Africa and deliver projects for clients all over the world.

At EURO2015, MCI are the Professional Conference Organising Company chosen by the conference Organising Committee to support the organisation of and aid the successful running of the conference.

## EURO 2015: Summary – delegate numbers and financial outcome

<b>EURO2015 delegate numbers</b>			
<b>"Regular participants"</b>	<b>Registration Cost</b>	<b>Numbers</b>	<b>% of regular delegates</b>
Student Early Reg (to 15 April)	£137.50	571	28%
Student Late Reg	£208.33	10	0%
Regular Early Reg	£250.00	1130	56%
Regular Late Reg	£333.33	298	15%
<b>Total</b>		<b>2009</b>	
<b>Others</b>			
Accompanying persons	£110.00	53	
Exhibitors & Sponsors		22	
Invited speakers		13	
Committee members		30	
Student support		60	
<b>Total</b>		<b>125</b>	
<b>Overall TOTAL</b>		<b>2134</b>	

## Financial Outcome

### INCOME

#### Registration Fees

	Unit Cost	No.	Amount	
Student Early	£ 137.50	571	£ 78,512.50	
Student Late	£ 208.33	10	£ 2,083.30	
Regular Early	£ 250.00	1130	£ 282,500.00	
Regular Late	£ 333.33	298	£ 99,332.34	
Acc. Person	£ 110.00	53	£ 5,830.00	
			<b>TOTAL</b>	<b>£ 468,258.14</b>

#### Social Event Fees

	Unit Cost	No.	Amount	
Inf. Network Stu.	£ 24.58	160	£ 3,933.33	
Inf. Network Reg.	£ 28.75	369	£ 10,608.75	
Conference Dinner	£ 58.33	529	£ 30,858.33	
			<b>TOTAL</b>	<b>£ 45,400.42</b>

**Accommodation Fees** £ 139,259.40

**Exhibition Fees** £ 9,975.00

**Sponsor Fees** £ 71,415.00

**GRAND TOTAL** £ 734,307.96

### EXPENDITURE

Congress Centre Rental	£ 45,945.00	
Printed Matter & Promo Material	£ 22,422.26	
Marketing & promotion	£ 4,220.55	
Technical Equipment / Services	£ 31,481.20	
Material for Participants	£ 5,723.45	
Speakers & Committee	£ 32,479.08	
On-site staff costs	£ 17,654.77	
Pre-congress secretariat	£ 3,000.00	
Insurance	£ 4,983.59	
Meals & Social Activities	£ 174,000.29	
EURO Fees / Conf. App / System integ.	£ 61,769.87	
PCO fees	£ 107,927.73	
<b>SUB-TOTAL (BUDGET S/SHT)</b>		<b>£ 511,607.79</b>

Accommodation £ 141,355.50

Registration Fee Refunds £ 1,793.90

**GRAND TOTAL** £ 654,757.19

**SURPLUS** £ 79,550.77

# Organisational matters

## Marketing:

Due to the overlap of the EURO-2015 conference with ISMP-2015 in Pittsburgh July 12-17, 2015 an extra effort had to be done to attract speakers and delegates to the conference.

- Fliers were handed out at numerous conferences
- Gerhard-Wilhelm Weber and other PC and OC members did a great effort marketing the conference at various conferences
- EURO2015 had a stand at IFORS Barcelona, July 13-18, 2014. The stand was open and manned during all breaks.
- Also, several mailing lists were used to announce the conference, themes, invited speakers, etc.

The conference was announced very widely, also to developing countries, and considerable resources were put into helping these people getting visas and possible fee reduction. Unfortunately, many of these talks had to be cancelled in the end because the delegates could not get funding or travel permissions for their trip. Future conferences should consider how this should be arranged in the future so we both can be inclusive to developing countries, but also do not drown in administrative support.

## Important Deadlines

The deadlines for the most important activities relating to the Conference were as follows.

- November 2014, web page open for submissions
- 16 March 2015, original abstract deadline
- 30 March 2015, extended abstract deadline
- 14 April 2015, notification of acceptance
- 20 April 2015, early bird registration deadline
- 12-15 July 2015, conference in Glasgow

The original deadline for abstract submission was March 16th, but following the tradition of EURO conferences it was extended by two weeks until March 30th. This meant that the PC had a good overview of all submitted papers for the joint PC-OC meeting in April 2015.

Several papers were accepted after the deadline to fill holes in the program stemming from participants who could not find funding.

## Work of the Committees

Formal meetings took place as follows:

July 17th 2014. First meeting of the PC, Barcelona

September 2014. First meeting of the OC

April 13-14 2015. Joint PC-OC meeting, Glasgow

In addition to this, the PC had several ad-hoc phone meetings, and the PC chair visited Glasgow twice to inspect the venue and discuss with the OC.

Members of the OC worked on specific aspects of the conference (sponsorship, scheduling, social media, conference App, social events, financial support for delegates) and a subgroup of the OC formed the core of the group that organised the Making an Impact streams).

On a (approximately) 6 week basis there were regular meetings between the OC Chairs, MCI, the University conference team and the OR Society.

The coordination of the event was ensured through weekly telephone meetings between the PC and OC Chairs.

### Submissions

EURO-2015 confirmed a general tendency seen over the last years, indicating that there are still more OR-conferences, and the competition to attract delegates is getting more and more tight. The overlap between EURO2015 and ISMP2015 did not make the situation easier.

The PC therefore decided to strive towards a higher quality of the EURO-2015 conference. This should be achieved by having excellent plenary and keynote speakers, tighter review process, longer abstracts of 1500 characters, and better keywords.

Keywords were improved by asking the authors to choose the first keyword from a given list of most common keywords. This made it easier to group contributed abstracts in appropriate sessions, and hopefully delegates could also easier find relevant talks.

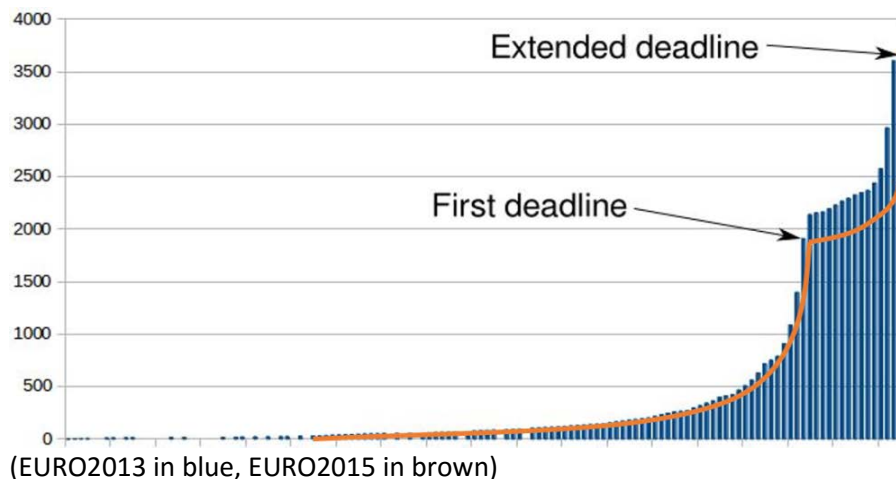

The longer abstracts made it easier to judge the quality of a presentation, and hopefully it also helped delegates in choosing the right talks to attend. Moreover the PC hoped that forcing the delegates to write more in the abstract would motivate the speakers to start preparing the talk earlier.

The review process was improved by instructing stream and session organizers about clear acceptance criteria for the abstracts. Wherever possible, authors were asked to improve the abstract, instead of just rejecting it.

Unfortunately there were a few cases of plagiarism in the submissions. This was discovered during the review process. After contacting the authors it turned out that it was apparently migrants trying to get invitations and a visa in this way. With the current global situation, one could expect that this will be a growing problem for future conferences, and it should be considered whether it is possible to have automated plagiarism control as part of the EURO submission system.

The submissions followed the general tendency from previous conferences with most abstracts submitted in the last days before the deadline.

The figure below shows a comparison between submissions for EURO-2013 (blue bars) and EURO-2015 (brown line). As seen, the submissions follow the same tendency, with EURO-2015 reaching around 1900 submissions at the first deadline. However, the extended deadline only gave 400-500 extra submissions, whereas EURO-2013, which was joint with INFORMS, received significantly more. One important reason for this difference could be that the extended deadline for EURO-2015 was announced after the first deadline, while EURO-2013 announced it a few days before the first deadline. While the submissions generally followed the trend from previous conferences, authors were generally slow at registering. This made it quite difficult to schedule the program, when it was unclear whether the speakers intended to participate. Future conferences should consider registration (not necessary with payment) as a prerequisite for submitting an abstract.

Finally, the conference used an innovative conference app that made it much easier for the delegates to find the appropriate talks. For this reason, only a limited number of the Conference Programme (which included the abstracts of talks) were printed. However, it was decided to include the full conference schedule (author name(s) and title of talk) in the Conference Handbook and to provide a printed copy of this for all delegates (both the schedule and full programme were also downloadable as a pdf).

### Areas and streams

The PC decided to update the areas of the conference. First of all, following the theme of the conference and reflecting the strong emphasis on OR in practice in the UK, an area on "Making an Impact" was introduced. Moreover, some smaller areas having quite few submissions in the last years were merged, area names made more precise. This resulted in the list of areas shown later. Each PC member was responsible for 2-3 areas, taking care of inviting stream organizers, advertising the area, and ensuring quality control. This resulted in the 163 streams shown later.

### Presentations

Overall 1924 presentations were delivered at EURO-2015 during the days 12-15 July. A breakdown of the presentations by country shows that most presenters came from United Kingdom (321 talks) followed by Germany (162 talks), Turkey (136 talks), Spain (105 talks), France (91 talks) and United States (84 talks).

It is interesting to note that United States was the sixth largest presenter at EURO-2015 despite the overlap with ISMP-2015 in Pittsburgh. This shows that EURO and ISMP conferences have a different scope, where EURO has more contributions on e.g. the application side, while ISMP has more contributions on e.g. mathematical programming. Probably future EURO conferences need to have a clear profile in order to maintain its position as the leading OR conference.

<b>AREA</b>	
Telecommunication, Networks and Social Networks	Analytics, Data Science, Data Mining
Soft OR and Problem Structuring Methods	Practice of OR
Location, Logistics, Transportation	Revenue Management
Energy/Environment and Climate	Production Management & Supply Chain Management
Continuous Optimization	Simulation, Stochastic and Robust Optimization

Greece	20	Venezuela	4	Thailand	1
Czech Republic	19	Slovakia	4	Bosnia And Herzegovina	1

## Innovations

In this section we discuss various innovations in the delivery of the conference, and consider how respondents to our end of conference questionnaire rated these innovations.

### Longer abstracts

The permitted length of submitted abstracts was increased to 1500 characters (from 600 or 700) to enable delegates to make better informed choices about which papers to attend. Of the 691 questionnaire respondents 47% found this helpful (43% didn't notice the change). The only "cost" associated with this was the small print run of the full abstract book (500 pages) hence we would recommend continuing this practice.

### Pre-conference and in-conference email newsletters

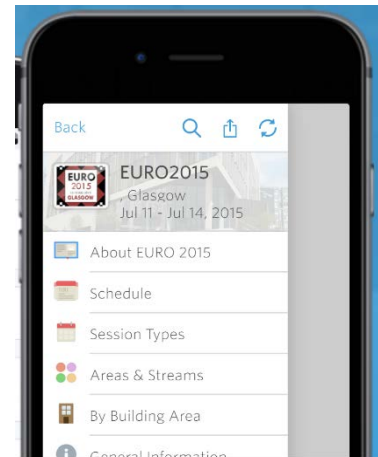

In the run up to the conference a weekly email newsletter was sent to all authors/registered participants. 96% of questionnaire respondents received these and 81% found them interesting useful. On this basis we would recommend continuing this practice.

A daily email was sent out each morning during the conference – 96% of questionnaire respondents received these and 81% said they were useful (13% didn't read them).

Again, we would recommend continuing this practice.

### Conference App

This was the first time that EURO has used an app. The Guidebook App previously used by ORS was used, but because of the size and complexity of the conference we used the pay-for version with support from a Guidebook developer. The initial version was created after a survey of existing large-conference apps enabled us to identify a couple with similar structure and size. This was then revised to make it easier to drill down to talk level though multiple entry points (eg day, building, stream etc). The main technical issue was to ensure that information from the EURO system could be easily streamed into the app back-end. Some development work by B. Fortz was required for this and, although that process was not without its challenges, in general the data sharing worked well. 50% of the questionnaire respondents downloaded the EURO2015 App and 89% of these rated it as Very Good or Fairly Good

In its android/iphone app version, Guidebook was well worth using. The web interface suffered from both a lower quality interface and the slow pace of searching/downloading pages. This problem would be considerably reduced for a smaller conference. There are now several conference app vendors (and indeed INFORMS has its own proprietary app). Several systems have apps for a wider range of smart phones (eg also windows phone and Blackberry).

The ease of use of a smartphone app, the ability to access information through multiple channels (eg building, stream, time), and the ability to update programme information essentially on-the-fly during the conference gives it many advantages over conventional printed systems. However, the risk to the conference of dependency on an external organisation was underlined through the problems on the week prior to the conference, when Guidebook unexpectedly scheduled a major IT upgrade which initially caused many problems.

It is recommended that future conferences use an app, but that the IT risk is mitigated through use of printed conference programme guides. Use of a developer is worthwhile to ensure that the full capability of the app is used.

### Making an Impact

This was the first time that a portfolio of MAI activities has been incorporated in a EURO Conference and it certainly contributed significantly to the promotion of the conference as one with a focus on "OR in Practice". Ruth Kaufman, chair of the MAI group has provided a detailed report on MAI which can assist future EURO organisers interested to include similar sessions. Overall, 44% of the questionnaire respondents said they had heard about MAI before the conference and an additional 28% heard about it during the conference. The nature of MAI, which is very different in format to a standard EURO stream, meant that there were some small organisational challenges with regard to scheduling and facilities and if this innovation is to continue at future EURO Conferences (we hope it will) it would be advisable to start discussions with both the PC and OC at an early stage.

### PhD Events

Bernd Wurth, a Strathclyde PhD student, took the initiative to organise a number of activities for PhD students. An informal social evening, which was held at Giraffe was very popular.

## SOCIAL EVENTS

During the conference a number of social events were held: The opening reception held across two locations, The Technology and Innovation Centre, and the historic Glasgow City Chambers; An informal party and dinner held at the Merchant Square, a group of restaurants based in the old indoor market; A traditional Scottish Ceilidh Dance held in the historic Barony Hall; and, the formal Conference Dinner held in and amongst the displays of the Glasgow Science Centre.

The Civic Reception ... Delegates taken to the City Chambers by our EURO2015 Piper!

The inside of the ornate Glasgow City Chambers...

Conference Chairs David Pisinger, Val Belton and Tim Bedford unexpectedly demonstrate their talents in close-harmony singing, accompanied by the Celtic music band at the formal Conference Dinner in the Glasgow Science Centre

# VENUES AND CAMPUS MAP

Technical sessions were held in several buildings on campus, with the main hub in the new Technology and Innovation Centre, and the plenary and Tutorial Sessions held in the historic Barony Hall. Buildings were grouped into nine sets, marked by both different colours and shapes. The signage used around the campus reflected the colours and shapes indicated here.

## MAKING AN IMPACT

'Making an Impact' activities are aimed at helping practitioners to become more effective and to encourage academic/practitioner interaction.

# Making an Impact:

## Participative Sessions for Practitioners (everybody welcome)

'Making an Impact' (MAI) is a series of participative activities aimed at helping practitioners to become more effective.

### For practitioners *and* academics

All MAI participative sessions are open to everybody. However, they are designed for people whose main aim is to make the organisations they work for more effective; rather than to develop the O.R. discipline, theory or quality of research.

MAI aims to enable O.R. professionals to have more impact on the outside world, by helping them find solutions to typical practical challenges, gain understanding of tools/techniques they haven't used before, build their networks, and learn from others in order to inspire and expand their own practice.

### MAI included:

- ❖ **Workshops**, each lasting either a whole or half session, on issues relevant to practitioners, such as: introductions to novel techniques or developments; dealing with practical issues such as cleaning data sets or quality assuring models; reflecting on professional practice and progression; and extending professional practice beyond the workplace;
- ❖ Facilitated '**speed networking**' sessions to help grow your professional network;
- ❖ **Academic-practitioner** collaborative sessions: a '**bazaar**' for sharing information on hot topics, and two **panel discussions** to inform better collaboration;
- ❖ **Mentoring sessions**, where practitioners or would-be practitioners can receive 20 minutes of mentoring from their choice of a number of experienced practitioners (advance sign-up essential – see the 'Making an Impact' desk in Level 2 TIC Building Exhibition area);
- ❖ '**Grand Challenges**': exploring how O.R. people can contribute to today's grand social challenges, to tackle disadvantage, challenge inequality and build strong, safe communities and identifying a 'call to action' and next steps.

# Practitioner activities at Euro2015
